Arrangement For Final Exam (Python)

Date: 22 August 2023
Time: 19:00pm - 20:30pm
Venue: CYT 615 & 613 (backup room); No Zoom Session.

Exam Format and Scope:

1. This exam is an open-book exam, and you are allowed to use Google. However, please complete the exam independently without any form of communication with others.

2. The exam will include three major questions, each with some sub-questions. Among them, two questions are relatively simple, and one is a little bit difficult. The questions will be similar to the examples and exercises we have covered.

3. The exam scope will cover the material we have studied in the past five weeks, but the questions will not include difficult part from the fifth week.

4. This exam will be conducted in the PC lab at CYT 615&613, where computers are already equipped with Anaconda installed. Some libraries (as mentioned in class) may need to be installed on your own. If you encounter any issues during the exam, feel free to notify me at any time.
